

1 - Articles dans des revues avec comité de lecture

- [1] F. Dumouchel, A. Faure and F. Lique, The rotational excitation of HCN and HNC by He: Temperature dépendance of the collisional rate coefficients, *Monthly Notices of the Royal Astronomical Society* **406**, 2488 (2010).
- [2] E. Sarrasin, D. Ben Abdallah, M. Wernli, A. Faure, J. Cernicharo and F. Lique, “The rotational excitation of HCN and HNC by He: New insights on the HCN/HNC abundance ratio in molecular clouds”, *Monthly Notices of the Royal Astronomical Society*, **404**, 518 (2010).
- [3] F. Lique, “Temperature dépendance of the fine-structure resolved rate coefficients for collisions of $O_2(X^3 \Sigma^-)$ with He”, *Journal of Chemical Physics*, **132**, 044311 (2010).
- [4] F. Lique, A. Spielfiedel, N. Feautrier, I. F. Schneider, J. Kłos and M. H. Alexander “Rotational excitation of $CN(X^2 \Sigma^+)$ by He : theory and comparison with experiments”, *Journal of Chemical Physics*, **132**, 024303 (2010)
- [5] K. Hammami, N. Jaidane, A. Spielfiedel, N. Feautrier and F. Lique, “Collisional Depolarization of MgH lines by He atoms”, *Chemical Physics Letters*, **484**, 148 (2010).
- [6] D. Decultot, R. Lietard, G. Maze, “Classification of a cylindrical target buried in a thin sand-water mixture using acoustic spectra”. *Journal of the Acoustical Society of America*, **127**, 1328-1334, (2010).
- [7] A. Goharzadeh & I. Mutabazi, Measurement of coefficients of the Ginzburg-Landau equation for patterns of Taylor spirals, *Phys. Rev. E* **82**, 016306 (2010).
- [8] B. Ezersky, N. Abcha & I. Mutabazi, The structure of spatio-temporal defects in a spiral pattern in the Couette-Taylor flow, *Phys. Lett. A* **374**, 3297-3303 (2010).
- [9] K. Lachgueur, S. Taibi, N. Abou Bekr, Comportement Hydrique d'une argile non saturée, application, *European Journal of Environmental and Civil Engineering* **14**, 3, 329-360 (2010).
- [10] D. Predoi, S. Derible, H. Duflo, Synthesis and ultrasonic characterization of hydroxyapatite ceramic powders, *Optoelectronics and Advanced Materials, Rapid Communications*, **4** (1), 110-114(2010).
- [11] P. Ouagne, J. Bréard, Continuous transverse permeability of fibrous media, *Composites Part A*, **41**, 22-28, 2010.
- [12] P. Ouagne, L. Bizet, C. Baley, J. Bréard, “Analysis of the Film-stacking Processing Parameters for PLLA/Flax Fiber Biocomposites”, *Journal of Composite Materials*, **44**(10), 1201-1215, 2010.

[13] Min-Kang Seo, Abdelghani Saouab, Soo-Jin Park, Effect of annealing temperature on electrochemical characteristics of ruthenium oxide/multi-walled carbon nanotube composites, *Materials Science and Engineering: B*, **167**, Issue 1, 25 February 2010, Pages 65-69.

[14] E. Irhirane, M. Abousaleh, J. Echaabi, M. Hattabi, A. Saouab. & M.O. Bensaleh, Modeling and Simulation of the Failure and Stiffness Degradation of a Graphite Epoxy in Three Points Bending Test. *ASME, Journal of Engineering Materials and Technology*, April 2009, Vol. **132**, 031013 (2010); doi:10.1115/1.3078392

[15] T. Still, M. Retsch, U. Jonas, R. Sainidou, P. Rembert, K. Mpoukouvalas et G. Fytas, *Vibrational Eigenfrequencies and Mechanical Properties of Mesoscopic Copolymer Latex Particles*, *Macromolecules* **43**, 3422–3428 (2010).

[16] B. Morvan, A. Tinel, A-C. Hladky-Hennion, J. Vasseur and B. Dubus. “Experimental demonstration of the negative refraction of a transverse elastic wave in a two-dimensional solid phononic crystal”. *Appl. Phys. Lett.* **96**, 101905 (2010).

[17] H. Lofti, B. Faiz, A. Moudden, D. Izbaim, A. Menou, G. Maze, Characterization of Mortars with Ultrasonic Transducer, *Moroccan Journal Condensed Matter*, 2010, 12(2), pp. 131-133

Ouvrages scientifiques et chapitres d’ouvrages scientifiques

[1] S. Taibi, J.M. Fleureau, Hadiwardoyo, H. Souli, A. Gomes Correia, *Le concept de contrainte effective dans les sols partiellement saturés*, Editions Hermes dans la collection MIM– Editeurs P.Y. Hicher, E. Flavigny, (à paraître 1er semestre 2010).

[2] H.Q. Wang, N-D. Ahfir, A. Alem, A.Beaudoin, A. Benamar, A. El kawafi, S. Oukfif, S. El Haddad, H. Wang, *Solid particles transport in porous media: experimentation and modelling*, Editors: A. Scuzzari & B. El Mansouri, Environmental security, Water security, Management and control, Nato Science for Peace and Security series –C: Environmental Security, Springer (à paraître 4^{ème} trimestre 2010)
